Performance schedule. The performance lasts 37 minutes.

Set-up time before each performance: 15 minutes. Build-down time: 5 minutes.

We prefer to give two performances per day.

The dancers require a minimum of 60 minutes of rest time between each performance.

Performance locations. Many possibilities: sidewalk, courtyard, city plaza, basketball court, playground, indoor gym, outdoor amphitheater, theater foyer, etc.

Stage. Ideal performance area: 9m x 9m. Minimum performance area: 6m x 6m.

We can perform directly on asphalt or concrete. Smooth cobblestones are also acceptable.

We can **not** perform on grass or dirt floors – the white costumes would get stained.

Audience. Ideally the audience sits/stands on all four sides of the performance area.

Audience capacity without risers: around 400. Audience capacity with risers: around 600.

Sound. Ideally the presenter provides a **mixing board** with five channels:

–Channel 1, input from the company's iPad (mini-jack port, stereo signal)

–Channel 2, input from the company's Røde Go Wireless Receiver (mini-jack port, stereo signal)

–Channels 3+4+5: input from 3x Nux Wireless Guitar System (3x jack plugs, mono signals)

Speakers: At a minimum, we recommend two 250W portable speakers.

The speakers should have a range that begins at 60 Hz. Alternatively, providing a subwoofer is a good way to ensure that our bass-heavy music sounds its best.

Light. If performed outdoors during the day, no lighting equipment is required. If performed indoors, or outdoors at night, the performance area requires basic illumination.

Dressing rooms. We request space for 4 dancers, equipped with mirrors and showers with hot water, and materials for ironing.

Laundry services. If show is presented on multiple days, the Presenter must provide laundry service to wash the costumes between each performance day.
